

SAIC 2017 Roewe i6 BIW

SAIC MOTOR is consistently striving to better respond to consumer demands for substantial improvements in vehicle fuel economy and reducing emissions while maintaining functionality and performance attributes. The use of lightweight materials and innovative vehicle design processes aided in the development of the new ROEWE I6, which is 71kg lighter than its predecessor.

Category:
Full Vehicle

Application:
2017 SAIC Roewe i6

Weight Savings:
71 kg
Weight reduction over baseline

Methodology:
Material Replacement
